STILLE Ögonsax | STILLE Eye Scissors

ORIGINAL

Saxar har alltid tillhört STILLEs storsäljare alltsedan de började tillverkas på 1800-talet. Genom åren har de ständigt förbättrats och fler specialmodeller har tillkommit. Idag finns de i totalt ca 200 varianter i alla storlekar och utformningar.

Originalsaxarna tillverkas i rostfritt stål av högsta kvalitet med högglanspolerad yta. De är välbalanserade med god skärstyrka ända ut i spetsarna och ligger bra i handen. Det finns originalsaxar för alla typer av mjukvävnad och de kan även användas för att klippa gasbinda, tråd och suturer.

SUPERCUT

Saxarnas sax uppfanns 1982. Många kirurger anser att SuperCut är världens absolut bästa kirurgisax. Den passar alla typer av mjuk vävnad och precisionen och prestandan är välkänd bland kirurger över hela världen.

Det revolutionerande med SuperCut är skärytorna som samarbetar på ett unikt sätt. Det ena bladet är saxslipat och det andra är knivslipat så att saxen skär sig fram genom vävnaden. Det ger maximal skärstyrka med minimal kraft och ett perfekt snitt. Slipningen gör saxen lämplig för både höger- och vänsterhänta. Trots många år på marknaden har ingen lyckats skapa en kopia som kan överträffa originalet.

STILLEs nya beläggning på SuperCut görs med ett mycket tunt diamantliknande skikt av s.k. DLC-coating, som reducerar risken för missfärgning, ökar instrumentets hållbarhet och bidrar till en bättre miljö.

ORIGINAL

Scissors have always been STILLE's bestseller ever since they were first produced in the 1800's. Through the years they have been continually improved and more special models have been introduced. Currently, there are in total about 200 different varieties in all sizes and shapes.

Our original scissors are manufactured of the highest quality, polished stainless steel. They are well balanced with outstanding cutting power right down to the tips and they fit well in the surgeon's hand. There are original scissors for all types of soft tissue and they can also be used to cut gauze, wire and sutures.

SUPERCUT

These unique scissors were introduced in 1982. Many surgeons believe that the SuperCut are unsurpassed as the world's best surgical scissors. They are suitable for all types of soft tissue and the precision and performance are well known among surgeons worldwide.

The revolutionary SuperCut scissors feature cutting surfaces that work together in a unique way. One blade is a scissor blade and the other is a knife blade to enable the scissors to cut precisely through the soft tissue. They provide maximum cutting power with minimal force and produce a perfect cut. The sharpening makes the scissors suitable for both right and left handed users. Despite many years on the market, other brands have not been able to create an imitation that can surpass the original SuperCut scissors.

The new STILLE coating process is based on a thin layer diamond-like-carbon proprietary technology, aiming to reduce discoloration, improve instrument durability and help to create a more sustainable environment.

STILLE-Mayo SuperCut XE dissektionssax |
STILLE-Mayo SuperCut XE Dissecting Scissors

DIAMOND SUPERCUT

Våra nya STILLE Diamond SuperCut saxar tar kirurgiska saxar till en ny nivå. Vi välkomnar er att uppleva dissektion, klippegenskaper och hållbarhet som ni aldrig tidigare upplevt. Diamond SuperCut är handgjorda av våra skickliga instrumentmakare i Eskilstuna. Saxarna är helbelagda med en ny diamantliknande beläggning, som ökar hållbarheten, minskar behovet av återkommande slipning, är mer motståndskraftig mot korrosion och är mer miljövänlig. Den nya Diamond-beläggningen är validerad för att tåla de allt vanligare rengöringsprocesserna med väteperoxid.

ERGONOMISKA SAXAR

En naturlig fortsättning på arbetet med att skapa perfekta saxar har varit att vidareutveckla deras ergonomiska egenskaper. Kirurgiska saxar hålls normalt i ett precisionsgrepp med tummen och lång- eller ringfingret. Vid mer tidskrävande ingrepp tröttas handen ut snabbare.

Lösningen är att vinkla skänklarna så att handen kan arbeta närmare sitt normala viloläge. Med ett större mellanrum mellan fingeröglorna motverkas spänningar och trötthet och handen orkar arbeta längre. Samtliga ergonomiska saxar är av modellen SuperCut med sina unika egenskaper. Sax- och knivslipade blad samverkar för maximal skärstyrka med minimal kraft och exakt precision.

DIAMOND SUPERCUT

The new STILLE Diamond SuperCut redefines the industry standards and breaks the limits in instrument performance. We welcome you to experience dissection, cutting performance and durability like you've never felt before. The Diamond SuperCut series of scissors are hand-made to perfection in Sweden. The scissors are fully coated with a new proprietary diamond-like-layer. It not only increases the life expectancy, it reduces the need of sharpening, is more resistant to corrosion and it's more environmental friendly. The new Diamond coating is validated to withstand the more common hydro peroxide processes.

ERGONOMIC SCISSORS

A natural extension of the ongoing effort to create the perfect scissors has been the further development of their ergonomic properties. Surgical scissors are normally held in a precise grip using the thumb and middle or ring finger. For more time-consuming procedures this can cause the hand to become fatigued faster.

The solution is to angle the shanks so that the hand can work closer to its normal resting position. With a larger gap between the finger loops, tension and fatigue is countered and the hand can work more comfortably for a longer period. All ergonomic scissors are SuperCut models with their unique characteristics. Scissor and knife sharpened blades work together for maximum cutting power with minimal effort and exact precision.
